My German Shepherd's First Time at the Beach

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

His very first beach day: unsure of the waves, then chasing them, digging in the sand, carrying driftwood along the shore, and crashing on a towel covered in sand.

TIMELINE

0-5s	First look at waves
5-10s	Chasing the waves
10-15s	Digging in sand
15-20s	Carrying driftwood
20-25s	Sandy and tired

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First look at waves): Quiet beach on a breezy morning, bright overcast sky, flat white light. The dog stands on dark wet sand at the water's edge, ears forward, watching a small foamy wave roll toward its paws. When the water touches its feet, it hops back two steps and stares at it. Sound: waves washing in, wind on the phone mic, owner laughing "it's just water". 5-10s (Chasing the waves): Same beach, bright overcast morning. The dog runs after the water as it pulls back out, splashing through the shallow foam, then turns and runs back up the sand when the next small wave comes in, ears flapping. Wet sand sticks to its legs. Sound: splashing, waves, owner cheering "get it!". 10-15s (Digging in sand): Dry sand higher up the beach, breezy morning, overcast light, a few footprints and bits of seaweed around. The dog digs fast with both front paws, sand flying out behind it, then pushes its nose into the hole and sniffs, coming up with sand on its muzzle. Sound: sand spraying, sniffing, wind. 15-20s (Carrying driftwood): Along the shoreline, wet packed sand, overcast morning light. The dog trots proudly along the edge of the water carrying a pale piece of driftwood in its mouth, head held high, small waves washing past its paws. It glances back to make sure the owner is following. Sound: waves, footsteps on wet sand, tags jingling. 20-25s (Sandy and tired): Faded striped beach towel spread on dry sand, overcast daylight, a backpack and flip-flops beside it. The dog lies down on the towel, legs and muzzle coated in sand, panting hard with its tongue out, then rests its chin on its paws and blinks at the camera. Sound: panting, waves in the background, owner says "you're tired, huh?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First look at waves

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. Sound: panting, waves in the background, owner says "you're tired, huh?".

FACEBOOK CAPTION

He was scared of the waves for exactly two minutes.
Then we couldn't get him out of the water.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
