Taking My German Shepherd to the Vet

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A routine checkup: refusing to walk in from the parking lot, waiting nervously, stepping on the scale, a gentle ear check, and pulling happily back to the car.

TIMELINE

0-5s	Parking lot refusal
5-10s	Waiting room
10-15s	On the scale
15-20s	Ear check
20-25s	Back to the car

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Parking lot refusal): Small parking lot outside a plain one-story building, overcast morning, flat grey daylight, parked cars nearby. Owner's point of view holding the leash. The dog walks a few steps, then sits down firmly on the pavement and leans back, leash tight, ears pinned back. Sound: distant traffic, owner sighing "come on, buddy". 5-10s (Waiting room): Quiet waiting room with plain light walls, speckled vinyl floor and a row of empty chairs, daylight through a front window. The dog sits pressed tightly against the owner's legs, ears back, panting nervously and glancing at a closed door across the room. Sound: nervous panting, a phone ringing far away, owner says "you're okay". 10-15s (On the scale): Corner of the same waiting room, window daylight, a low flat grey platform scale on the floor with the display out of frame. The owner's hand guides the dog onto it. The dog stands stiffly with all four paws on the platform, shifting its weight and looking up at the owner. Sound: claws on the platform, a small whine. 15-20s (Ear check): Small exam room, plain walls, daylight from one small window, the dog sitting on the vinyl floor. The vet's hands in blue gloves gently lift one ear and look inside while the owner's hand rests on the dog's chest. The dog holds still and licks its lips. Sound: quiet room, owner says "good boy, almost done". 20-25s (Back to the car): Same parking lot, overcast late morning light. The dog trots quickly toward the car pulling on the leash, tail wagging hard, body loose and happy, glancing back at the owner as if to hurry them up. The plain clinic door swings shut behind them as the owner hurries to keep up. Sound: tags jingling, quick footsteps, owner laughing "now you're happy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Parking lot refusal

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
