Caught My German Shepherd Digging in the Garden

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Caught in the act: digging up the flower bed, freezing with a dirty nose, the evidence, the innocent look, and cleaning off muddy paws at the back door.

TIMELINE

0-5s	Caught in the act
5-10s	Frozen mid-dig
10-15s	The evidence
15-20s	Innocent look
20-25s	Muddy paw cleanup

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Caught in the act): Backyard flower bed along a wooden fence, late morning, sunny with scattered clouds, dark soil and a few small pink petunias. The dog is digging fast with both front paws, soil flying out behind it onto the grass, tail wagging. Sound: dirt spraying, owner gasping "hey! what are you doing?". 5-10s (Frozen mid-dig): Same flower bed, late morning daylight. The dog stops instantly and looks up at the camera with its front paws still in the hole, dirt all over its nose and muzzle, ears slightly back, completely still. A small clump of soil drops off its whiskers onto the flower bed. Sound: birds, owner says "really?". 10-15s (The evidence): Same flower bed, late morning daylight. The camera tilts down to show a deep hole, soil scattered across the grass, and a dug-up petunia lying on its side with roots showing. The dog's muddy front paws are at the edge of the frame. Sound: owner sighing "I just planted those". 15-20s (Innocent look): Back patio next to the yard, late morning daylight. The dog sits on the concrete with dirt still on its nose, ears back, looking away from the camera, then glancing back for a second and licking its lips. Muddy paw prints lead across the concrete behind it. Sound: owner laughing "don't give me that look". 20-25s (Muddy paw cleanup): Back door, late morning daylight, an old doormat on the step. The dog stands on the mat while the owner's hand wipes one muddy front paw with a damp old towel. The dog patiently lifts the next paw on its own. Sound: towel rubbing, tags jingling, owner says "other paw".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Caught in the act

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog patiently lifts the next paw on its own. Sound: towel rubbing, tags jingling, owner says "other paw".

FACEBOOK CAPTION

I asked who dug up my flowers.
He didn't even try to hide it.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
