Playing Hide and Seek With My German Shepherd

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A round of hide and seek at home: waiting on a stay, me hiding in the closet, the search, the find, and a happy victory bounce.

TIMELINE

0-5s	Sit and stay
5-10s	Hiding in the closet
10-15s	The search
15-20s	Found you
20-25s	Victory bounce

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Sit and stay): Hallway, afternoon, daylight from a window, wooden floor and a few framed photos on the wall. The dog sits in the middle of the hallway while the owner's open hand signals stay. The camera backs away and the dog stays put, eyes locked on the camera, quivering a little. Sound: owner whispering "stay... stay". 5-10s (Hiding in the closet): Inside a bedroom closet, filming out through the gap of a half-open door, hanging clothes at the edge of the frame. The bedroom beyond is lit by afternoon daylight from the window and is empty. The camera shakes slightly as the owner holds back a laugh. Sound: owner whispering loudly "okay, find me!". 10-15s (The search): Same bedroom, seen from the closet gap, afternoon daylight. The dog trots into the room with its nose down, sniffing along the side of the bed, then lifts its head and looks around, ears forward. It checks under the bed for a second, then sniffs toward the closet. Sound: claws on the floor, sniffing, a stifled laugh. 15-20s (Found you): Closet doorway, afternoon daylight from behind. The dog's head pushes around the edge of the closet door right into the camera, nose filling the view for a moment, then pulls back with its tail wagging hard. Its tags clink against the door frame as it wiggles. Sound: owner laughing "you found me!", happy panting. 20-25s (Victory bounce): Living room, afternoon daylight, a worn rug and a couch. The dog bounces in a happy circle on the rug, then sits down in front of the camera, tail sweeping the floor, waiting for the next round. A squeaky toy lies forgotten on the rug beside it. Sound: paws thumping, panting, owner says "one more time?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sit and stay

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A squeaky toy lies forgotten on the rug beside it. Sound: paws thumping, panting, owner says "one more time?".

FACEBOOK CAPTION

He finds me in under ten seconds every time.
I need better hiding spots. Any ideas?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
