Frisbee in the Field With My German Shepherd

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Morning frisbee in an open field: the ready crouch, the throw and chase, the catch, bringing it back, and a chewing break in the grass.

TIMELINE

0-5s	Ready position
5-10s	Throw and chase
10-15s	The catch
15-20s	Bringing it back
20-25s	Chewing break

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Ready position): Large open grass field at a park, early morning, bright overcast sky, a row of trees far away, slight breeze. The dog stands low and crouched in front of the owner, eyes locked on a red plastic frisbee in the owner's hand, body trembling with excitement. Sound: wind, birds, an excited whine, owner says "ready?". 5-10s (Throw and chase): Same open field, overcast morning light. The owner's arm throws the red frisbee low across the field and the dog sprints after it at full speed, grass flicking up behind its paws, getting smaller in the frame. Its ears fold back against its head as it runs. Sound: frisbee whoosh, pounding paws, owner shouting "go get it!". 10-15s (The catch): Same field, flat overcast daylight. The red frisbee drops toward the grass and the dog makes a small jump and catches it in its mouth at chest height, lands, and keeps running in a curve. Dew sprays off the grass where its paws hit the ground. Sound: owner cheering "yes! good catch!", wind. 15-20s (Bringing it back): Same field, overcast morning light. The dog trots back toward the camera with the red frisbee in its mouth, head high, then drops it on the grass right in front of the owner's sneakers and stares at it. Grass and dew stick to its paws and chest. Sound: panting, frisbee hitting the grass, owner says "good boy". 20-25s (Chewing break): Same open field, overcast daylight, dewy grass. The dog lies down in the grass holding the frisbee between its front paws, chewing on the edge, panting hard, ignoring the owner asking for it back. Its tail swishes slowly across the wet grass. Sound: chewing, heavy panting, owner laughing "break time?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Ready position

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
