Christmas Morning With My German Shepherd

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Christmas morning at home: waiting by the tree, sniffing out his present, tearing the wrapping paper, prancing with his new toy, and napping in the paper mess.

TIMELINE

0-5s	Waiting by the tree
5-10s	Sniffing his present
10-15s	Unwrapping his present
15-20s	New toy prance
20-25s	Wrapping paper nap

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Waiting by the tree): Living room, early Christmas morning, pale grey winter daylight through the window, a decorated tree in the corner with wrapped presents underneath. The dog lies on the rug next to the presents, head up, watching the camera, tail sweeping the floor. Sound: quiet house, tail swishing, owner whispering "merry Christmas, buddy". 5-10s (Sniffing his present): Same living room, winter morning daylight. The owner's hands set a soft package wrapped in plain red paper on the rug in front of the dog. The dog sniffs it all over, nose pushing into the paper, tail wagging faster. Sound: paper crinkling, sniffing, owner says "that one's yours". 10-15s (Unwrapping his present): Same rug, grey morning daylight from the window. The dog holds the package down with one front paw and tears at the red paper with its teeth, ripping off big pieces and tossing them aside, until a plush brown reindeer toy shows through. Sound: paper ripping, family laughing in the background. 15-20s (New toy prance): Same living room, winter morning light. The dog prances around the coffee table with the plush reindeer in its mouth, squeaking it with every step, head high, tail wagging, scraps of red paper scattered on the rug. It stops by the tree for a second to look back at the camera. Sound: squeak, squeak, squeak, owner laughing "he loves it". 20-25s (Wrapping paper nap): Same rug near the tree, later in the morning, soft winter daylight. The dog lies among torn scraps of red wrapping paper with its chin resting on the plush reindeer, eyes slowly closing. The tree and empty boxes sit in the background, and one ear twitches each time someone laughs in the kitchen. Sound: soft breathing, paper rustling, quiet family voices.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Waiting by the tree

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
