Big Dog Meets Tiny Kitten

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

The first careful meeting with a new kitten: watching from a distance, a slow sniff through a baby gate, lying down calmly, a gentle nose touch, and resting near each other.

TIMELINE

0-5s	Curious watching
5-10s	Sniff through the gate
10-15s	Lying down calm
15-20s	Nose touch
20-25s	Resting nearby

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Curious watching): Living room, late morning, soft daylight through sheer curtains, beige carpet. A small grey tabby kitten sits on the carpet across the room. The dog stands still near the couch, ears forward, head tilted, watching the kitten without moving closer. Sound: quiet room, owner whispering "easy, easy". 5-10s (Sniff through the gate): Hallway with a white baby gate, daylight from a nearby window, wooden floor. The small grey tabby kitten sits on one side of the gate, the dog on the other. The dog lowers its nose slowly to the gate bars and sniffs, tail wagging gently. Sound: soft sniffing, a tiny meow, tail brushing the wall. 10-15s (Lying down calm): Living room, daylight, beige carpet. The dog lies down on its belly with its head low on its front paws, staying very still. The small grey tabby kitten walks a few steps closer across the carpet, stops and sits. The dog's tail gives one slow sweep across the carpet while its eyes stay on the kitten. Sound: quiet, a soft whine, owner says "good boy, gentle". 15-20s (Nose touch): Same living room, soft window light, close to the floor. The small grey tabby kitten steps right up to the dog's face. The dog holds still while the kitten sniffs its nose, then the dog gives one slow sniff back and blinks. Sound: tiny sniffs, owner gasping softly "oh my gosh". 20-25s (Resting nearby): Living room, afternoon light through the curtains. The dog lies on a dog bed on the carpet with its eyes half closed. The small grey tabby kitten is curled up asleep a short distance from the dog's front paws. The dog glances at it and sighs. Sound: soft breathing, a quiet sigh, distant traffic.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Curious watching

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
