Saturday at the Dog Park

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A Saturday morning at the dog park: walking through the gate, sniffing a friendly lab, a short chase, fetch on the open grass, and a drink at the park water bowl.

TIMELINE

0-5s	Through the gate
5-10s	Meeting a friend
10-15s	Short chase
15-20s	Open field fetch
20-25s	Park water bowl

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Through the gate): Dog park entrance, Saturday morning, mild overcast daylight, chain-link fence and a double gate, wood chips on the ground. The dog stands inside the gate as the owner unclips the red leash, then trots off into the park, tail high. Sound: gate latch clanking, leash clip, distant barking. 5-10s (Meeting a friend): Open grassy area of the park, cloudy morning, worn grass with dirt patches. A friendly yellow Labrador walks up. The two dogs sniff each other's faces, then circle once, tails wagging loosely, and stand side by side. Other dogs play far off in the background, and a few owners stand near the fence, out of focus. Sound: sniffing, distant voices, birds. 10-15s (Short chase): Same park, overcast daylight, wide open grass, chain-link fence in the background. The yellow Labrador runs across the grass and the dog chases it in a big loose loop, both running side by side, then slowing down to a trot. Sound: paws thudding on grass, play barks, owner laughing. 15-20s (Open field fetch): Edge of the park field, cloudy daylight, trees beyond the fence. The owner's hand throws a worn green tennis ball. The dog sprints after it alone, scoops it up and trots back, dropping it near the owner's sneakers. Its paws kick up small bits of dirt as it turns, and the ball is wet and grass stained. Sound: ball bouncing, panting, owner says "nice catch". 20-25s (Park water bowl): Near the park bench, late morning, cloudy daylight, a large metal water bowl on a concrete pad beside the fence. The dog drinks from it noisily, water splashing over the edge, then lifts its dripping chin and looks at the camera, panting. Sound: lapping, splashing, distant barking, wind.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Through the gate

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
