His First Camping Trip

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A weekend camping trip: hopping out at the campsite, sniffing around the tent, a lakeside wade, lying by the campfire at dusk, and curling up inside the tent.

TIMELINE

0-5s	Arriving at camp
5-10s	Tent inspection
10-15s	Lakeside wade
15-20s	By the campfire
20-25s	Tent sleep

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Arriving at camp): Forest campsite, afternoon, cloudy daylight through tall pine trees, dirt ground covered in pine needles, a car with its back hatch open. The dog jumps down from the back of the car and immediately starts sniffing the ground, tail wagging. Sound: car hatch creaking, birds, wind in the pines, owner says "we are here". 5-10s (Tent inspection): Same campsite, afternoon shade under the pines, a green dome tent set up on the dirt. The dog walks slowly around the tent, sniffing the bottom edge and the stakes, then pokes its head into the open tent door. A folding camp chair and a cooler sit beside the tent, and the dog's tail wags as it backs out again. Sound: nylon rustling, sniffing, birds. 10-15s (Lakeside wade): Rocky lakeshore near the campsite, late afternoon, grey cloudy sky, calm water and pine trees on the far shore. The dog wades into the shallow water up to its chest, bites at a small ripple, then turns back toward the camera. Sound: water splashing, loons calling, owner laughing. 15-20s (By the campfire): Campsite at dusk, fading blue daylight, a small campfire in a stone fire ring lighting the dirt nearby. The dog lies on a folded blanket at a safe distance from the fire, its damp coat drying, calmly watching the flames. Sound: fire crackling, crickets, owner's quiet voice. 20-25s (Tent sleep): Inside the green tent at night, dim light from a small battery lantern, sleeping bag on the floor. The dog lies curled up on top of the sleeping bag, nose tucked in, and lifts one eyebrow at the camera before closing its eyes. Sound: crickets outside, wind on the tent, owner whispering "good night, camper".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Arriving at camp

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
