Teaching Him to Ring the Bell to Go Out

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Teaching the dog to ring hanging potty bells: sniffing the bells, a nose touch for a treat, ringing them with a paw, the door opening, and ringing them on his own later.

TIMELINE

0-5s	Sniffing the bells
5-10s	Nose touch
10-15s	Paw ring
15-20s	Door opens
20-25s	Rings on his own

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Sniffing the bells): Back door in the kitchen, morning, daylight through the glass door, beige tile floor. A strap of small brass bells hangs from the door handle. The dog walks up and sniffs the bells, making them jingle softly, then jumps back a little. Sound: soft bell jingling, owner laughing "it is okay". 5-10s (Nose touch): Same back door, morning daylight. The dog bumps the bells with its nose, making them ring. The owner's hand immediately offers a small treat from the side and the dog takes it. The dog's tail wags fast, and a pair of muddy sneakers sits on a mat by the door. It looks right back at the bells as if waiting for the next treat. Sound: bells ringing, treat crunching, owner says "yes! good". 10-15s (Paw ring): Kitchen back door, late morning light, tile floor. The dog lifts one front paw and swats the hanging bells, making them ring loudly, then looks up at the camera with ears forward. Its tail swings wide and its paw drops back down onto the tile. A water bowl sits by the wall and the backyard is visible through the glass. Sound: loud jingling, owner gasps "you did it!". 15-20s (Door opens): Back door opening onto a small wooden deck and backyard, bright overcast daylight. The owner's hand pulls the door open and the dog trots out onto the deck and down the steps toward the grass. The bells swing against the door as it opens, a patio chair and a planter sit on the deck, and the dog's tail is high as it goes. Sound: door opening, bells jingling, birds outside. 20-25s (Rings on his own): Kitchen back door, afternoon, daylight through the glass, tile floor. The camera is across the kitchen. The dog walks up to the door by itself, nudges the bells with its nose, and looks back at the camera, waiting. Its tail wags slowly and the bells keep swinging for a moment. A dish towel hangs on the oven handle in the foreground. Sound: bells jingling, owner whispering "no way", a soft huff.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sniffing the bells

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

Day 3 of bell training and he is already using it on me.
Has anyone else tried potty bells?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
