Morning Jog With My Running Buddy

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

An early morning jog: harness on at the door, jogging down a quiet street, a water break, a stretch on the grass and a tired walk home.

TIMELINE

0-5s	Harness on
5-10s	Jogging the street
10-15s	Water break
15-20s	Grass stretch
20-25s	Walk home

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Harness on): Front entryway, early morning, pale blue daylight through a small door window, running shoes on a doormat. The dog stands wagging its tail while the owner's hands clip a black running harness around its chest. The dog spins once toward the door. Sound: tags jingling, the harness buckle clicking, owner says "ready?". 5-10s (Jogging the street): Quiet suburban sidewalk, early morning, cool grey light, parked cars and lawns on one side. Camera is the owner's point of view while jogging, slightly bouncing. The dog trots beside the owner's legs on a short leash, tongue out, ears forward. Sound: sneakers slapping pavement, the owner's breathing, birds, the dog's light panting. 10-15s (Water break): Edge of a small neighborhood park, early morning, soft overcast light, damp grass. The owner crouches and holds out a collapsible blue silicone water bowl. The dog laps the water eagerly, drops splashing on the path. Sound: loud lapping, owner breathing hard, a car passing in the distance. 15-20s (Grass stretch): Same park, early morning, overcast light, patchy grass and a wooden bench. The owner's legs in black running tights stretch on the grass. The dog rolls onto its back next to them and wiggles in the wet grass, legs in the air. Sound: birds, grass rustling, owner laughs and says "that's not stretching". 20-25s (Walk home): Same quiet street, morning light a little brighter now. Camera faces down toward the dog walking slowly beside the owner's sneakers on the sidewalk, tongue hanging out, panting hard, glancing up at the camera now and then. Sound: slow footsteps, heavy panting, tags jingling, owner says "good run, bud".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Harness on

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
