Running Beside My Bike

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

An afternoon bike ride on a quiet park trail: getting ready, trotting alongside the bike, a short stop, a puddle crossing and a rest in the shade.

TIMELINE

0-5s	Ready to ride
5-10s	Trotting alongside
10-15s	Quick stop
15-20s	Puddle crossing
20-25s	Shade rest

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Ready to ride): Driveway in the afternoon, bright overcast daylight, a blue bike leaning on a garage door. The dog stands next to the bike wearing a padded orange harness attached to a short leash, tail wagging fast, looking up at the owner. Sound: tags jingling, the bike kickstand clicking, owner says "let's go". 5-10s (Trotting alongside): Flat paved park trail, afternoon, soft daylight, trees and mowed grass on both sides. Camera is the owner's point of view from the bike, handlebar edge in frame. The dog trots steadily beside the front wheel on the grass side, ears forward, at an easy pace. Sound: bike tires humming, chain clicking, the dog's steady panting, birds. 10-15s (Quick stop): Same trail, afternoon daylight, a wooden trail post beside the path. The bike stops and the owner's foot touches the ground. The dog stops too, sits down panting and sniffs the air, then looks up at the camera. Sound: brakes squeaking softly, panting, owner says "good wait". 15-20s (Puddle crossing): Gravel section of the trail, afternoon, cloudy light, a shallow muddy puddle across the path. The bike rolls slowly around the edge while the dog trots straight through the puddle, splashing muddy water up its tan legs. Sound: gravel crunching, water splashing, owner laughs "of course you did". 20-25s (Shade rest): Grassy spot under a big leafy tree beside the trail, afternoon, dappled daylight, the bike lying on its side. The dog lies in the cool grass with its muddy legs stretched out, panting, and the owner's hand pats its side. Sound: breeze in the leaves, slow panting, distant kids playing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Ready to ride

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
