He Talks Back (Every Single Time)

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Everyday sass at home: the dog grumbles when told no, howls with a siren, groans at bath time, argues for a walk and ends with one last huff and flop on the couch.

TIMELINE

0-5s	Grumbles at no
5-10s	Siren howl
10-15s	Groans at bath
15-20s	Asks for walk
20-25s	Final huff

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Grumbles at no): Kitchen in the afternoon, daylight through a window, beige tile floor. The dog stands by the counter staring at a plate. The owner's voice says no and the dog looks at the camera and lets out a long low grumbling whine. Sound: owner says "no, that's mine", a long grumbling woo-woo sound from the dog. 5-10s (Siren howl): Living room by the front window, late afternoon daylight, sheer curtains. The dog sits on the carpet, points its nose up toward the ceiling and howls along with a passing siren outside, ears back. Sound: an ambulance siren fading by outside, the dog's long howl, owner laughing. 10-15s (Groans at bath): Hallway outside a bathroom, afternoon indoor light, wooden floor. The owner's hand holds up a towel. The dog lies down flat on the floor, rolls half onto its side and makes a long groaning noise without getting up. Sound: owner says "bath time", a long groan, tags clinking on the floor. 15-20s (Asks for walk): Front door area, evening, warm hallway light, sneakers on a mat. The dog stands facing the camera and makes a series of short grumbling woo sounds, front paws shifting, then looks at the door and back at the camera. Sound: woo-woo-woo grumbles, owner says "in five minutes", more grumbling. 20-25s (Final huff): Living room couch, evening lamp light. The dog climbs onto the couch, flops down with its back to the camera, lets out a loud huff through its nose and then glances back over its shoulder. Sound: couch cushions squishing, a loud huff, owner says "okay, okay, we'll go".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Grumbles at no

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
