Moving Day to Our New House

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Moving day from his point of view: checking the packed boxes, watching the movers load the van, the car ride, exploring the empty new house and his first nap in his old bed there.

TIMELINE

0-5s	Inspecting the boxes
5-10s	Watching the movers
10-15s	Car ride
15-20s	Exploring the new house
20-25s	First nap at home

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Inspecting the boxes): Old apartment living room, morning daylight from bare windows, plain brown cardboard boxes stacked against a white wall, a rolled-up rug on the wood floor. The dog walks between the boxes sniffing each one, then stops and looks back at the camera with its ears up, a little unsure. Sound: tape ripping somewhere behind, echoing footsteps, owner says "it's okay, bud". 5-10s (Watching the movers): Sidewalk outside the old apartment building, overcast midday, a plain white moving van with its back door open at the curb. The dog sits on a leash next to the owner's legs, turning its head to follow two movers as they carry a grey couch up the ramp into the van. Sound: traffic, movers talking, the metal ramp clanking. 10-15s (Car ride): Back seat of a car, overcast daylight through the windows, a lamp and a couple of boxes on the seat beside the dog. The dog sits on an old blanket, clipped in with a seatbelt harness, looking out the side window as houses pass, then turns to sniff the box next to it. Sound: engine hum, turn signal clicking, owner says "almost there". 15-20s (Exploring the new house): Empty living room in the new house, afternoon daylight through windows with no curtains, light grey carpet, bare white walls. The dog walks in slowly with its nose down, sniffing along the baseboards and into the corners of the empty room, its tail low at first and then starting to wag. Sound: echo in the empty room, soft paw steps, owner says "this is home now". 20-25s (First nap at home): Same new living room, early evening, dim grey daylight from the window, a stack of unopened boxes against the wall. The dog's old familiar bed sits on the grey carpet. The dog circles twice on the bed, lies down with a sigh and rests its chin on the edge, watching the owner. Sound: a big sigh, distant tape ripping, quiet room.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Inspecting the boxes

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
