Who Destroyed the Pillow?

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Coming home to a living room full of pillow stuffing: the discovery, the suspect with fluff on his nose, the questioning, a sorry lean and his idea of helping clean up.

TIMELINE

0-5s	The discovery
5-10s	The suspect
10-15s	The questioning
15-20s	Sorry lean
20-25s	Helping clean up

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (The discovery): Living room, midday daylight through half-open blinds, light grey couch, hardwood floor. The camera walks in from the front door and shows white pillow stuffing scattered across the floor and the couch cushions, with a torn empty pillow cover lying on the rug. Sound: keys jingling, door closing, owner gasps "what happened here?". 5-10s (The suspect): Same living room, midday light through the blinds. The dog lies on the rug next to the mess with a tuft of white fluff stuck to its nose, ears pulled back, glancing up at the camera and then looking away at the wall. Sound: quiet room, tail thumping softly once. 10-15s (The questioning): Living room, midday light, white fluff all over the hardwood floor. The camera moves closer to the dog. The dog lowers its head, slowly thumps its tail on the floor and licks its lips, avoiding eye contact with the owner. Sound: owner asks "was this you?", slow tail thumps. 15-20s (Sorry lean): Living room, midday daylight, stuffing scattered behind. The dog gets up and walks to the camera with its ears back and its tail low and wiggling, then leans its whole body against the owner's legs in jeans and looks up. Sound: claws on the floor, a soft whine, owner says "oh, don't look at me like that". 20-25s (Helping clean up): Living room, midday light. The owner's hand stuffs fluff into a white trash bag on the floor. The dog picks up the torn pillow cover in its mouth and trots off across the room with it, tail wagging. A few white tufts float up behind him as he goes. Sound: trash bag rustling, paws trotting, owner says "hey, give that back".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | The discovery

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
