Neighborhood Watch From the Window

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

His morning shift at the front window: taking his post on the couch, tracking a jogger, nose prints on the glass, an alert bark at a van and a half-asleep finish.

TIMELINE

0-5s	Taking his post
5-10s	Tracking a jogger
10-15s	Nose prints
15-20s	Alert bark
20-25s	Half asleep on duty

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Taking his post): Front living room, early morning, pale daylight through a big front window, a beige couch pushed against the window. The dog climbs onto the couch and rests its front paws and chin on the back cushion, looking out at the quiet street. Sound: couch creaking, birds outside, owner says "on duty already?". 5-10s (Tracking a jogger): Same beige couch by the front window, morning light. Through the glass a jogger in a grey hoodie passes on the sidewalk. The dog's ears go up and its head turns slowly to follow the jogger, then it gives one low woof. Sound: a single low woof, faint footsteps outside. 10-15s (Nose prints): Close view of the front window glass, morning daylight. The dog presses its nose against the glass, leaving foggy nose smudges, and watches a neighbor walking a small white dog across the street, its tail wagging slowly against the cushion. Sound: soft whining, nose squeaking on the glass. 15-20s (Alert bark): Front window, mid morning, overcast daylight. A plain white van stops at the curb outside. The dog stands up on the couch cushions, barks twice at the glass with its tail held stiff, then stares at the van. The back cushion is pushed crooked under its front paws. Sound: two loud barks, van engine idling outside, owner says "easy, easy". 20-25s (Half asleep on duty): Same beige couch, late morning, soft daylight through the front window. The dog lies down on the cushions with its chin resting on the windowsill, eyes half closed, but its ears still turn toward every small sound from the street. Sound: distant lawn mower, a car passing, a sleepy sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Taking his post

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
