Squirrel in the Yard

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

The daily squirrel showdown on an autumn morning: the freeze, the sprint, paws up on the tree, barking at the branches and walking away like he never cared.

TIMELINE

0-5s	The freeze
5-10s	The sprint
10-15s	Paws on the tree
15-20s	Barking up the tree
20-25s	Never cared anyway

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (The freeze): Backyard, cool autumn morning, overcast daylight, fallen orange leaves on the grass, a big oak tree near a wooden fence. The dog stands completely still in the middle of the yard, one front paw lifted, ears forward, staring at a grey squirrel sitting on the grass. Sound: birds, leaves rustling, owner whispering "don't do it". 5-10s (The sprint): Same leafy backyard, overcast autumn morning. The grey squirrel darts toward the oak tree and the dog bolts after it across the lawn, dry orange leaves kicking up behind its paws as it runs. The camera shakes as the owner takes a few quick steps after them. Sound: leaves crunching, paws thudding, owner yelling "hey!". 10-15s (Paws on the tree): Base of the big oak tree, overcast morning, leaves piled around the roots. The squirrel is already on a high branch. The dog puts its front paws up on the trunk, staring up into the branches, whining and wagging its tail. Sound: whining, bark scratching under the claws, squirrel chattering. 15-20s (Barking up the tree): Under the oak tree, overcast autumn daylight, wooden fence behind. The dog stands on all fours and barks up at the branches, walks once around the trunk, then stops and stares up again with its head tilted back. A few dry leaves stick to the fur on its legs. Sound: barking, squirrel chattering from above. 20-25s (Never cared anyway): Backyard, overcast morning, leaves on the grass. The dog walks away from the tree, sniffs a pile of leaves along the wooden fence, then stops and glances back over its shoulder at the oak tree. Its tail swings slowly and its ears stay turned toward the branches. Sound: leaves crunching, sniffing, owner laughing "next time, buddy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | The freeze

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
