Learning to Swim in the Pool

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

His first swim lesson in a life vest: checking out the water, standing on the steps, his first paddle with help, swimming back to the steps and a big shake on the deck.

TIMELINE

0-5s	Checking the water
5-10s	On the steps
10-15s	First paddle
15-20s	Back to the steps
20-25s	Big shake

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Checking the water): Backyard pool deck, sunny summer afternoon, light grey concrete deck, blue pool water, a few pool noodles on the edge. The dog stands on the deck wearing an orange dog life vest with a handle on the back, sniffing the edge of the water. Sound: water lapping, birds, owner says "it's just water, bud". 5-10s (On the steps): Wide first step of the pool, sunny afternoon, water up to the dog's legs. Wearing its orange life vest, the dog taps the water with one front paw and looks at the owner standing waist deep in the pool in front of it. Sound: splashing paw, owner saying "come on, you can do it". 10-15s (First paddle): Shallow end of the pool, bright sunny afternoon. The owner's hand holds the handle on the orange life vest as the dog paddles forward, front legs splashing, head held high above the water, eyes wide. Sunlight ripples on the pool floor below the dog. Sound: splashing, heavy breathing, owner says "good boy, good boy". 15-20s (Back to the steps): Shallow end of the pool, sunny afternoon. The dog in its orange life vest paddles on its own toward the pool steps, the owner walking beside it in the water, and climbs out onto the steps. Water streams off the life vest as it steps up. Sound: splashing, water dripping, owner cheering. 20-25s (Big shake): Pool deck, sunny summer afternoon, light grey concrete. The dog stands in its orange life vest and shakes the water off hard, then rolls on a striped towel on the warm concrete, panting. Drops splash onto the owner's bare feet at the edge of the frame. Sound: water spraying, towel rustling, owner laughing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Checking the water

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
