New Bed Day

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A brand new dog bed arrives: the suspicious sniff, testing it with one paw, digging and circling, the big flop and dozing off while the old bed sits retired in the corner.

TIMELINE

0-5s	Suspicious sniff
5-10s	Testing it
10-15s	Digging and circling
15-20s	The big flop
20-25s	Dozing off

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Suspicious sniff): Bedroom, late morning daylight through a window, light wood floor, an unmade bed in the background. A brand new large grey dog bed sits on the floor. The dog walks around it slowly, sniffing the edges, tail held still. The torn plastic wrap lies crumpled nearby. Sound: sniffing, quiet room, owner says "it's yours, go on". 5-10s (Testing it): Same bedroom, late morning daylight, light wood floor. The dog puts one front paw into the new grey bed, pauses, then steps in with all four paws and stands in the middle looking at the camera. Its tail starts a slow, careful wag. Sound: soft cushion sound, tags jingling. 10-15s (Digging and circling): Bedroom floor, late morning light. Standing in the new grey bed, the dog scratches at the cushion with its front paws, digging, then turns in a circle and digs again. The cushion bunches up into a lumpy pile in one corner of the bed. Sound: scratching on fabric, owner laughing "you'll ruin it". 15-20s (The big flop): Bedroom, late morning daylight on the wood floor. The dog circles one more time and flops down in the new bed with a big sigh, rolling onto its side and stretching all four legs out. One back paw hangs over the edge of the bed. Sound: thud, a big sigh, cushion squishing. 20-25s (Dozing off): Bedroom, early afternoon daylight through the window. The dog is curled up in the new grey bed with its chin on the raised edge, eyes slowly closing. The old flat worn bed sits pushed into the corner behind it. A sock lies on the floor next to it. Sound: slow breathing, a soft snore, owner whispering "best money I ever spent".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Suspicious sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Bedroom, late morning daylight through a window, light wood floor, an unmade bed in the background. A brand new large grey dog bed sits on the floor. The dog walks around it slowly, sniffing the edges, tail held still. The torn plastic wrap lies crumpled nearby. Sound: sniffing, quiet room, owner says "it's yours, go on".

Clip 2 | 5-10s | Testing it

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The old flat worn bed sits pushed into the corner behind it. A sock lies on the floor next to it. Sound: slow breathing, a soft snore, owner whispering "best money I ever spent".

FACEBOOK CAPTION

He took one sniff and decided he lives here now.
The old bed is officially retired.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
