Playing Soccer in the Yard

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A backyard soccer match: chasing the first kick, blocking a shot like a goalie, dribbling with his nose, pinning the ball against the fence and a halftime rest in the shade.

TIMELINE

0-5s	First kick
5-10s	Goalie block
10-15s	Nose dribbling
15-20s	Fence pin
20-25s	Halftime rest

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First kick): Backyard, sunny late afternoon, uneven green grass with a few bare patches, a wooden fence and a small plastic goal net in the corner. The owner's foot taps a big blue rubber ball across the grass. The dog races after it and pushes it along with its chest and nose. Sound: a dull kick, paws thudding, owner shouting "go get it". 5-10s (Goalie block): Same backyard, late afternoon sun, the small goal net behind the dog. The dog stands in front of the net in a low crouch, eyes on the ball. The owner kicks it softly toward the net and the dog lunges sideways and blocks it with its chest and front legs. Sound: ball thumping off the dog, owner laughing "what a save". 10-15s (Nose dribbling): Backyard, sunny late afternoon, patchy grass and a garden hose coiled by the fence. The dog trots across the yard pushing the blue ball ahead of it with its nose, steering it left and right, tail high, following it all the way to the other side of the yard. Sound: ball rolling on grass, panting, birds. 15-20s (Fence pin): Backyard by the wooden fence, late afternoon light, a few weeds along the bottom boards. The ball rolls against the fence and the dog pins it there with both front paws, then tries to grab it with its mouth, its teeth sliding off the round rubber, and tries again. Sound: teeth squeaking on rubber, grunting, owner laughing. 20-25s (Halftime rest): Shady corner of the backyard under a maple tree, early evening, cool shadows on the grass. The dog lies on its belly with the blue ball between its front paws, tongue hanging out, panting hard, and looks up at the camera with grass stuck to its chest. Sound: heavy panting, leaves rustling, owner saying "halftime".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First kick

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
