Dinner Time Manners

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Showing off his dinner manners: sitting while the bowl is filled, waiting with the bowl on the floor, eating on the release word, licking the bowl clean and lying calmly during the family dinner.

TIMELINE

0-5s	Sit for dinner
5-10s	The wait
10-15s	Release and eat
15-20s	Licking it clean
20-25s	Calm at the table

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Sit for dinner): Kitchen, early evening, ordinary ceiling light switched on and dusky light at the window, grey tile floor. The owner's hand scoops dry kibble from a plastic bin into a steel bowl on the counter. The dog sits perfectly still on the tiles, eyes on the bowl, ears forward. Sound: kibble scooping, owner saying "sit, good boy". 5-10s (The wait): Same kitchen, ceiling light, grey tile floor. The owner sets the full steel bowl on the floor a foot in front of the dog and says wait. The dog stays sitting, looks at the bowl, then up at the owner, licks its lips, and looks back at the bowl, trembling slightly with excitement. Sound: bowl clinking on tile, owner saying "waaait", a tiny whine. 10-15s (Release and eat): Kitchen, evening ceiling light, grey tile floor, a rubber mat under the bowl. The owner says okay and the dog dives in, eating fast with its face deep in the bowl, a few kibbles spilling over the edge onto the mat. Sound: owner saying "okay", loud crunching, tag clinking on the bowl. 15-20s (Licking it clean): Kitchen, evening ceiling light, grey tile floor. The empty steel bowl slides across the tiles as the dog licks the inside of it, pushing it slowly toward the cabinet until it bumps into the baseboard, then the dog licks the spilled kibble off the mat. Sound: bowl scraping on tile, licking, a clang against the cabinet. 20-25s (Calm at the table): Dining room, evening, a warm hanging lamp over a wooden dining table with plates and family members' legs under it. The dog lies calmly on the rug beside the table, chin resting on its paws, not begging, eyes slowly blinking while the family eats. Sound: forks on plates, family chatting, a parent saying "look how good he is".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sit for dinner

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
