Learning to Fetch the Newspaper

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Training day for a new job: finding the newspaper on the driveway, picking it up, dropping it halfway, carrying it up the porch steps and delivering a slightly slobbery paper.

TIMELINE

0-5s	Finding the paper
5-10s	Pick it up
10-15s	Halfway drop
15-20s	Up the steps
20-25s	Delivery

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Finding the paper): Front driveway, early morning, cool pale daylight, damp grey concrete, a lawn with dew on it. A rolled newspaper in a plain grey plastic bag lies near the bottom of the driveway. The owner's hand points at it. The dog trots down the driveway and sniffs the bag curiously. Sound: birds, footsteps, owner saying "get the paper". 5-10s (Pick it up): Same driveway, early morning light, damp concrete. The dog nudges the plastic bag with its nose, rolls it over, then finally picks it up in the middle with its mouth, holding it sideways, and lifts its head proudly with its tail wagging. Sound: plastic crinkling, owner cheering "yes, good boy". 10-15s (Halfway drop): Front walkway, morning, pale daylight, concrete path between two small flower beds. Halfway to the house the dog drops the newspaper on the path, sniffs a flower bed instead, then looks back at the paper. The owner claps and the dog picks it up again. Sound: plastic slapping on concrete, owner clapping "bring it, bring it". 15-20s (Up the steps): Front porch steps, morning daylight, painted grey wooden steps, a doormat and a potted fern. The dog climbs the steps carefully with the bagged newspaper sticking out of both sides of its mouth, tail held high, walking toward the camera. Sound: paws on wooden steps, tags jingling, owner saying "almost there". 20-25s (Delivery): Front porch, morning daylight, open front door behind the owner. The dog drops the slightly chewed, slobbery bagged newspaper right on the owner's slippers and sits with a proud pant. The owner's hand gives it a small treat, which it takes gently. Sound: soft thud, panting, owner laughing "a little wet, but thank you".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Finding the paper

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
