Kitchen Floor Cleanup Crew

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Nothing that hits the kitchen floor survives: a dropped cucumber slice, runaway blueberries, spilled plain rice, the toddler's high chair and checking the dustpan after sweeping.

TIMELINE

0-5s	Cucumber drop
5-10s	Blueberry chase
10-15s	Rice spill
15-20s	High chair post
20-25s	Dustpan check

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Cucumber drop): Kitchen, midday, bright daylight from the window, white counters and a light grey tile floor. The owner chops a cucumber on a cutting board and one slice falls off the edge. The dog, lying nearby, is on it instantly, snatching it off the tile and crunching. Sound: knife chopping, a soft plop, claws scrambling, crunching. 5-10s (Blueberry chase): Same kitchen, midday daylight, grey tile floor. A handful of blueberries spills from a plastic container and rolls across the tiles in every direction. The dog chases them, nose to the floor, gobbling one after another and sniffing under the cabinet edge for the last one. Sound: blueberries bouncing, snuffling, owner laughing "get them all". 10-15s (Rice spill): Kitchen, early evening, ordinary ceiling light, grey tile floor near the stove. A small spoonful of plain white cooked rice falls on the floor. The dog licks it up thoroughly, its tongue sweeping back and forth across the tiles until nothing is left. Sound: busy licking, a pot simmering, owner saying "thanks, vacuum". 15-20s (High chair post): Kitchen dining corner, evening ceiling light, a white high chair with a toddler in it and a parent sitting right beside him holding a spoon. The dog sits calmly on the floor next to the high chair, looking up. A small piece of plain banana drops and the dog gently eats it. Sound: toddler babbling, parent laughing "he dropped it on purpose". 20-25s (Dustpan check): Kitchen, evening ceiling light, grey tile floor. The owner sweeps crumbs into a red dustpan with a short broom. The dog walks over and sticks its nose straight into the dustpan, sniffing hard, while the owner gently pushes its head away. Sound: broom bristles sweeping, sniffing, owner saying "no, that's trash".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Cucumber drop

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
