Taking Out the Trash Together

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Trash night is a team job: inspecting the bag, walking out to the bins, rolling the bin down the driveway, sniffing the mailbox post and watching the garbage truck the next morning.

TIMELINE

0-5s	Bag inspection
5-10s	To the bins
10-15s	Rolling the bin
15-20s	Mailbox sniff
20-25s	Garbage truck alert

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Bag inspection): Kitchen, evening, ordinary ceiling light, white cabinets and grey tile floor. The owner's hands tie the handles of a full white trash bag sitting on the floor. The dog sticks its nose against the bag and sniffs it all over, very interested. Sound: plastic rustling, sniffing, owner saying "there's nothing for you in there". 5-10s (To the bins): Side of the house at dusk, a porch light switched on, a narrow concrete path along the siding and two big plastic trash bins. The owner carries the bag in one hand and holds a leash in the other. The dog walks ahead along the path, sniffing the bins. Sound: footsteps on concrete, crickets, the bin lid thumping shut. 10-15s (Rolling the bin): Front driveway at dusk, street lights just turning on, dark blue sky, a sloped concrete driveway. The owner rolls a big green trash bin down toward the street. The dog trots beside the bin on a loose leash, glancing at the rumbling wheels. Sound: bin wheels rumbling on concrete, tags jingling, crickets. 15-20s (Mailbox sniff): Curb at the end of the driveway at dusk, a street light overhead, a wooden mailbox post and neighbor bins down the street. The bin is parked at the curb. The dog sniffs the base of the mailbox post thoroughly while the owner waits holding the leash. Sound: sniffing, a car passing slowly, owner saying "okay, let's go in". 20-25s (Garbage truck alert): Front living room, next morning, cool grey daylight through the big front window. The dog stands at the window with its ears up, watching a garbage truck stop at the curb, out of focus outside. It gives one deep bark and wags its tail. Sound: truck brakes hissing, bins clanking, one deep bark.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Bag inspection

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
