His Funny Sleeping Positions

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A collection of his weirdest sleeping positions around the house: upside down on the couch, curled in a donut, head hanging off the edge, frog legs on the tile and using the shoes as a pillow.

TIMELINE

0-5s	Upside down
5-10s	Donut curl
10-15s	Head hanging off
15-20s	Frog legs
20-25s	Shoe pillow

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Upside down): Living room, afternoon, plain daylight from a side window, a dark green couch with throw pillows. The dog lies flat on its back on the couch with all four legs sticking up in the air, front paws bent, lips flopped open showing a bit of teeth, snoring softly. Sound: soft snoring, owner whispering "how is this comfortable?". 5-10s (Donut curl): Bedroom corner, morning, grey daylight through blinds, a round dog bed that is a little too small for him on the carpet. The dog is curled into a tight donut with its nose tucked under its tail, legs hanging over the edge of the bed. One ear twitches. Sound: quiet room, slow breathing, a clock ticking. 10-15s (Head hanging off): Living room, evening, ordinary lamp light, a grey couch. The dog sleeps on its side on the couch with its head hanging over the edge, upside down, ears dangling toward the floor, tongue tip poking out. Its paw twitches once. Sound: TV murmuring in the background, owner laughing quietly. 15-20s (Frog legs): Kitchen, hot afternoon, daylight from the window, cool beige tile floor. The dog lies flat on its belly on the tiles with both back legs stretched straight out behind it like a frog, chin flat on the floor, eyes closed. Sound: ceiling fan whirring, a deep sigh, owner saying "froggy mode". 20-25s (Shoe pillow): Front entryway, early evening, ordinary hallway ceiling light, a doormat and a messy pile of sneakers and boots by the door. The dog is asleep on the floor with its head resting right on top of the pile of shoes, mouth slightly open. Sound: quiet snoring, owner whispering "those are my work shoes".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Upside down

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
