Running in His Dreams

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Catching him chasing something in his sleep: twitching paws, full running legs, muffled woofs, waking up confused and settling back down after a gentle pat.

TIMELINE

0-5s	Twitching paws
5-10s	Running legs
10-15s	Sleep woofs
15-20s	Wakes up confused
20-25s	Back to sleep

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Twitching paws): Living room, rainy afternoon, dim grey daylight from the window, a faded blue area rug on wood floors. The dog lies on its side fast asleep on the rug. Its front paws start to twitch in small quick movements and its eyelids flutter. Sound: rain on the window, soft breathing, owner whispering "he's dreaming". 5-10s (Running legs): Same living room, rainy afternoon light, blue rug. Still lying on its side asleep, the dog's legs begin to paddle in a steady running motion, front and back legs moving together, claws lightly scratching the rug, body otherwise still, eyes shut tight. Sound: claws brushing the rug, rain, owner laughing very quietly. 10-15s (Sleep woofs): Living room, dim rainy daylight, blue rug. Close on the sleeping dog's face. Its cheeks puff out and lips twitch as it gives small muffled woofs with its mouth closed, whiskers twitching, while its tail thumps lightly on the floor. Sound: muffled boof boof sounds, tail tapping wood, rain. 15-20s (Wakes up confused): Living room, rainy afternoon, grey light. The dog suddenly lifts its head off the rug, eyes wide, and looks around the room, then at the camera, ears half up, as if trying to figure out where the thing it was chasing went. Sound: a sharp snort, tags jingling, owner saying "did you catch it?". 20-25s (Back to sleep): Living room, rainy afternoon light, blue rug. The owner's hand gently strokes the dog's side. The dog lays its head back down, lets out a long sigh, closes its eyes and goes still, its breathing slowing down as rain runs down the window. Sound: rain, a long sigh, owner whispering "go back to sleep".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Twitching paws

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. Sound: rain, a long sigh, owner whispering "go back to sleep".

FACEBOOK CAPTION

I would give anything to know what he's chasing.
Squirrel? Mailman? The vacuum?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
