Counter Surfing Attempt

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Catching him trying to counter surf: paws up sniffing the bread, acting innocent, a second attempt when he thinks no one is looking, getting busted and the bread moving to the cabinet.

TIMELINE

0-5s	Paws on the counter
5-10s	Acting innocent
10-15s	Second try
15-20s	Busted
20-25s	Bread goes away

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Paws on the counter): Kitchen, late morning, plain daylight from the window, white laminate counters and beige tile floor. A loaf of bread in a plastic bag sits near the counter edge. The dog stands with its front paws on the counter edge, nose stretched toward the bread, sniffing hard. Sound: sniffing, plastic crinkling, owner saying "hey, off". 5-10s (Acting innocent): Same kitchen, late morning daylight, beige tile floor. The dog is now lying on the floor right below the counter, chin on its paws, looking very innocent, but its eyes keep flicking up toward the bread and back to the camera. Sound: quiet kitchen, fridge humming, owner saying "I saw that". 10-15s (Second try): Kitchen, late morning daylight. Camera peeks around the edge of the hallway doorframe into the kitchen. The dog looks toward the empty hallway, then slowly stands and puts its front paws back up on the counter edge, nose creeping toward the bread bag. Sound: claws tapping laminate, owner whispering "here we go". 15-20s (Busted): Kitchen, late morning daylight, beige tile floor. The owner steps into the kitchen. The dog drops off the counter instantly and sits down right in front of it, ears back, tail sweeping the floor slowly, looking up at the owner. Sound: footsteps, claws hitting the tile, owner laughing "busted". 20-25s (Bread goes away): Kitchen, late morning daylight, white cabinets. The owner's hand puts the bread into an upper cabinet and closes the door. The dog watches the cabinet, then lies down on the tile floor with a big huffy sigh, chin flat on the floor. Sound: cabinet door closing, a long huff, owner saying "nice try".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Paws on the counter

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
