Car Keys Mean Car Ride

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

One jingle of the car keys and he is ready: leaping off his bed, waiting at the front door, whining while the owner puts on shoes, jumping into the car and arriving at the park.

TIMELINE

0-5s	Key jingle
5-10s	Door ready
10-15s	Shoe wait
15-20s	Jump in the car
20-25s	Park arrival

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Key jingle): Living room, Saturday morning, bright overcast daylight from the window, a big grey dog bed in the corner. The dog is lying in the bed half asleep. The owner's hand picks up a set of car keys and they jingle. The dog's head snaps up and it leaps out of the bed. Sound: keys jingling, a thump, tags jingling, owner laughing. 5-10s (Door ready): Front hallway, morning daylight through the small window in the front door, a shoe rack and a coat hook. The dog stands at the door nose to the gap, spins around once in a circle, then stares back at the camera, tail wagging so hard its whole rear sways. Sound: claws on wood, excited whining, owner saying "hold on, hold on". 10-15s (Shoe wait): Front hallway, morning daylight, the owner sitting on a small bench tying sneakers, only their hands and knees visible. The dog sits right next to the bench pressed against the owner's leg, whining softly and nudging the owner's hand with its nose. Sound: soft whines, shoelaces pulling, owner saying "you're so impatient". 15-20s (Jump in the car): Driveway, cool overcast morning, a silver SUV with the back door open, damp concrete and a lawn beside it. The dog runs to the car and jumps straight onto the back seat covered with an old blanket, turns around and sits facing the camera, panting. Sound: paws on concrete, a thump onto the seat, car door, panting. 20-25s (Park arrival): Small park parking lot, mid-morning, overcast daylight, gravel lot with green grass and trees beyond. The SUV back door opens and the dog hops out on a red leash, lands on the gravel, shakes itself and immediately pulls toward the grass, nose up. Sound: gravel crunching, birds, tags jingling, owner saying "we're here".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Key jingle

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
