My Garage Workshop Buddy

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A weekend project in the garage with my shadow: supervising from his rug, sniffing the sawdust, flinching at hammer taps, bringing his rope toy and testing the raised bed I built him.

TIMELINE

0-5s	Rug supervisor
5-10s	Sawdust sniff
10-15s	Hammer taps
15-20s	Rope toy delivery
20-25s	Testing his bed

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Rug supervisor): Home garage, Saturday morning, overhead fluorescent lights and grey daylight through the open garage door, a cluttered wooden workbench and a concrete floor. The owner sands a pine board by hand with sandpaper. The dog lies on an old brown rug beside the bench, watching. Sound: sandpaper scratching, a radio talking quietly, birds outside. 5-10s (Sawdust sniff): Same garage, morning light, concrete floor dusted with pale sawdust under the bench. The dog gets up and sniffs the sawdust pile, then sneezes, shaking its head, sawdust stuck to its nose, and looks at the camera with a puzzled blink. Sound: sniffing, a loud sneeze, owner laughing "bless you". 10-15s (Hammer taps): Garage, morning light, the owner's hands hammering a small nail into a board on the workbench. The dog lies a few feet away on the rug with its head up, ears twitching backward at each tap of the hammer, but it stays lying down. Sound: hammer tapping, ears flapping, owner saying "almost done". 15-20s (Rope toy delivery): Garage, late morning, daylight from the open door, tools hanging on a pegboard. The dog walks up holding a frayed blue and white rope toy in its mouth and pushes it against the owner's knee, tail wagging, until the owner's hand takes it and gives a small tug. Sound: tags jingling, a playful grunt, owner saying "break time?". 20-25s (Testing his bed): Garage, midday, daylight from the open garage door, a newly built raised wooden dog bed frame with a mesh top sitting on the concrete floor. The dog sniffs the frame, steps up onto it, turns once and lies down on it, looking up at the camera. Sound: wood creaking slightly, a content sigh, owner saying "you like it?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Rug supervisor

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog sniffs the frame, steps up onto it, turns once and lies down on it, looking up at the camera. Sound: wood creaking slightly, a content sigh, owner saying "you like it?".

FACEBOOK CAPTION

I spent all Saturday building him a bed.
He supervised every single minute.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
