Exploring the Woods

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A quiet walk through the woods: sniffing a mossy log, digging in dry leaves, carrying a stick that is way too big, listening to a woodpecker and a water break by a tree.

TIMELINE

0-5s	Mossy log sniff
5-10s	Digging in leaves
10-15s	Too big stick
15-20s	Woodpecker listening
20-25s	Water by a tree

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Mossy log sniff): Mixed forest, late morning, overcast daylight filtering through the branches, a narrow dirt path covered in old leaves. The dog walks up to a fallen log covered in green moss and sniffs along it slowly from one end to the other, tail swaying, one front paw resting on top of the log. Sound: birds, leaves rustling, focused sniffing, tags jingling. 5-10s (Digging in leaves): Same forest, overcast daylight, thick layer of brown and yellow dry leaves between the trees. The dog shoves its nose under the leaves, then paws at them quickly with both front feet, sending leaves flying behind it, stops, sniffs the hole and looks back at the camera with leaves stuck to its muzzle. Sound: crunching leaves, quick digging, owner laughing "what did you find?". 10-15s (Too big stick): Forest path, overcast midday, tall thin tree trunks on both sides, muddy patches on the trail. The dog proudly trots toward the camera holding a long branch in the middle of its mouth, the branch much wider than the path, one end bumping into a small tree so the dog stops and adjusts. Sound: branch scraping, footsteps on leaves, owner says "that's a tree, not a stick". 15-20s (Woodpecker listening): Small clearing in the woods, overcast daylight, ferns and moss on the ground, tall trees around. The dog stands still with its ears turned up toward the treetops, head tilting slightly as a woodpecker taps somewhere above, then takes a few curious steps toward the nearest trunk and sniffs the bark. Sound: woodpecker tapping, breeze in the trees, quiet sniffing. 20-25s (Water by a tree): Base of a large oak tree in the forest, overcast afternoon, roots and leaves on the ground, the owner's backpack leaning on the trunk. The owner's hand pours water from a bottle into a blue collapsible bowl and the dog drinks eagerly, water dripping from its chin, then sits down panting beside the backpack. Sound: water pouring, loud lapping, panting, birds in the background.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Mossy log sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
