Collecting Sticks on the Beach

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A windy beach day where he collects sticks: finding the first piece of driftwood, adding it to a pile, dragging a huge branch, trotting the shoreline and chewing next to his collection.

TIMELINE

0-5s	First find
5-10s	The pile
10-15s	Huge branch
15-20s	Shoreline trot
20-25s	Collection chew

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First find): Sandy beach, cool overcast afternoon, grey sky, windy, scattered seaweed and pieces of pale driftwood on the sand. The dog sniffs along the sand, finds a short piece of driftwood, picks it up in its mouth and trots toward the camera with its tail up. Sound: waves, wind, seagulls, panting, tags jingling. 5-10s (The pile): Beach, overcast windy afternoon, the owner's striped bag on the sand with a small pile of driftwood sticks beside it. The dog walks up and drops the stick on top of the pile, sniffs the pile, then turns and trots off along the sand to look for more. Sound: stick clattering, waves, owner laughing "another one?". 10-15s (Huge branch): Upper beach near the dunes, overcast daylight, dry sand and beach grass. The dog grabs the end of a big long driftwood branch and drags it backwards across the sand, leaving a long line, stopping to adjust its grip and pulling again. Sound: branch scraping on sand, wind, owner saying "that's too big". 15-20s (Shoreline trot): Edge of the water on the beach, overcast afternoon, small calm waves washing up on the wet sand. The dog trots along the shoreline with a stick in its mouth, paws splashing in the thin water, leaving footprints in the wet sand, tail high. Sound: small waves, splashing paws, seagulls. 20-25s (Collection chew): Beach near the owner's striped bag, overcast late afternoon, a pile of six or seven driftwood sticks on the sand. The dog lies down beside the pile, holding one stick between its front paws and chewing on the end, sand stuck to its legs and chin. Sound: chewing, waves, wind, owner says "we're not taking them home".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First find

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

Came for a walk.
Left with a whole lumber yard. Does your dog collect sticks too?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
