Sledding Day With the Kids

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A sledding day with the kids and their dad: climbing the hill, running beside the sled, a happy greeting at the bottom, carrying the sled rope uphill and warming up at home.

TIMELINE

0-5s	Up the hill
5-10s	Running alongside
10-15s	Bottom greeting
15-20s	Rope carry
20-25s	Thawing out

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Up the hill): Gentle snowy hill in a park, late morning, bright overcast winter daylight, bare trees at the top. Two kids in puffy jackets pull a red plastic sled up the slope with their dad beside them, and the dog walks next to them, nose to the snow, tail wagging. Sound: snow crunching, kids chatting, dad saying "almost at the top". 5-10s (Running alongside): Same snowy hill, overcast daylight. A boy in a blue jacket slides down the gentle slope on the red sled at an easy speed, and the dog runs beside the sled through the snow, ears back, snow spraying from its paws, keeping a little space from the sled. Sound: sled hissing on snow, boy laughing, a happy bark. 10-15s (Bottom greeting): Bottom of the sledding hill, overcast winter light, flat snowy ground. The boy sits in the stopped sled laughing, and the dog trots up, sniffs his face and licks his cheek while the boy pats its snowy back with his mitten, their dad walking down behind. Sound: boy giggling, panting, dad saying "he's checking on you". 15-20s (Rope carry): Snowy hill, late morning, overcast daylight, the boy pulling the empty red sled back up the slope with his dad. The dog grabs the end of the sled rope in its mouth and walks uphill beside the boy, tail high, the sled sliding behind them. Sound: snow crunching, kids laughing "he's helping", tags jingling. 20-25s (Thawing out): Front entryway at home, early afternoon, ordinary ceiling light, tile floor, wet kids' boots and mittens piled by the door. The dog lies on a rubber mat with snow melting off its fur, a kid's hand rubbing it with a towel, its eyes half closed. Sound: towel rubbing, kids talking, a happy dog sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Up the hill

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
