Visiting the Horse Stable

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A calm visit to a friend's horse stable: walking up the drive, seeing a horse from a safe distance, sniffing the air politely, checking the hay bales and resting by the barn.

TIMELINE

0-5s	Barn approach
5-10s	First horse
10-15s	Polite sniffing
15-20s	Hay bale sniff
20-25s	Barn wall rest

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Barn approach): Gravel drive leading to a red wooden barn, cool morning, overcast daylight, white wooden fences and green paddocks on both sides. The dog walks calmly on a short leash beside the owner's legs, looking ahead at the barn, ears up, tail relaxed. Sound: gravel crunching, birds, a horse nickering far away. 5-10s (First horse): Beside a white wooden paddock fence, overcast morning, a brown horse standing in the grass several meters back from the fence. The dog stops and sits beside the owner a good distance from the fence, staring at the horse, ears forward, very still. Sound: horse snorting, owner saying quietly "easy, just look". 10-15s (Polite sniffing): Same paddock, overcast daylight, the brown horse lowering its head to graze far from the fence. The dog stays sitting on leash at a calm distance, lifting its nose to sniff the air, tail sweeping slowly over the gravel, then looks up at the owner. Sound: horse chewing grass, sniffing, owner says "good boy, stay calm". 15-20s (Hay bale sniff): Open entrance of the barn, morning, natural daylight from the big doorway, a stack of square hay bales against the wall, straw on the concrete floor. The dog sniffs along the hay bales, pulls back with a small sneeze, then sniffs again. Sound: a sneeze, sniffing, a horse shifting in a stall far inside. 20-25s (Barn wall rest): Shady side of the red barn, late morning, overcast daylight, gravel ground and a water trough nearby, the paddock in the distance. The dog lies on the gravel beside the owner's boots, calmly watching the horse grazing far away, chin resting on its paws. Sound: birds, a horse whinny far off, calm breathing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Barn approach

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

He was so polite around the horses.
Made me very proud today. Has your dog ever met a horse?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
