Morning Sunbath on the Balcony

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A lazy apartment morning: stepping out onto the balcony, flopping into the sunny patch, rolling belly up, watching a pigeon and dozing off next to the owner's coffee.

TIMELINE

0-5s	Out to the balcony
5-10s	Sunny patch flop
10-15s	Belly up
15-20s	Pigeon watch
20-25s	Dozing in the sun

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Out to the balcony): Apartment living room, early morning, bright natural sunlight coming through a glass sliding door. The owner's hand slides the door open and the dog walks out onto a small balcony with grey tiles and a metal railing, stretching its back legs as it steps out. Sound: door sliding, claws on tile, city sounds outside. 5-10s (Sunny patch flop): Small apartment balcony, morning, bright sunlight on part of the grey tile floor, a potted plant and a folding chair in the corner. The dog sniffs the sunny patch, turns once and flops down in the middle of it with a big sigh, stretching out on its side. Sound: big sigh, distant traffic, birds. 10-15s (Belly up): Same balcony, morning sunlight on the tiles. The dog rolls onto its back in the sun, belly up, front paws bent loosely in the air, back legs flopped open, eyes half closed, its tail slowly sweeping the tiles while the warm sun shines on its pale belly fur. Sound: soft tags clink, owner laughing quietly "no shame at all". 15-20s (Pigeon watch): Apartment balcony, sunny morning, the metal railing and buildings across the street. A pigeon lands on the neighbor's railing a few meters away, and the dog lifts its head from the tiles, ears up, watching it closely without getting up, its nose twitching a little. Sound: pigeon cooing, flapping wings, city noise below. 20-25s (Dozing in the sun): Apartment balcony, morning, warm sunlight, the owner's feet in grey slippers and a white coffee mug on a small table beside the folding chair. The dog lies stretched out in the sun next to the slippers, eyes slowly closing, ribs rising and falling. Sound: soft breathing, a sip of coffee, distant traffic.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Out to the balcony

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
