Night Walk With a Flashlight

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A quiet late night walk with a flashlight: waiting on the porch, walking in the beam on a dark road, sniffing a bush, stopping to listen to an owl and a drink back in the kitchen.

TIMELINE

0-5s	Porch at night
5-10s	In the beam
10-15s	Bush sniff
15-20s	Owl listening
20-25s	Kitchen water

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Porch at night): Front porch of a house at night, a single yellow porch light on, dark yard beyond, doormat and a pair of sneakers by the door. The dog stands on the porch with its leash on, tail wagging, while a flashlight beam switches on and points at the steps. Sound: crickets, flashlight click, tags jingling, owner says "ready?". 5-10s (In the beam): Dark quiet country road at night, no streetlights, only the round beam of a flashlight on the asphalt ahead. The dog walks on a loose leash in the beam a little ahead of the owner, its back and tail lit by the flashlight, darkness on both sides. Sound: crickets, footsteps on asphalt, tags jingling. 10-15s (Bush sniff): Side of the dark road at night, the flashlight beam on a leafy roadside bush and tall grass. The dog pushes its nose into the bush and sniffs carefully, tail wagging slowly, moving along the edge of the grass while the beam follows it. Sound: sniffing, leaves rustling, crickets. 15-20s (Owl listening): Dark road at night under tall trees, the flashlight beam on the ground near the dog. An owl hoots somewhere in the trees, and the dog stops, lifts its head and turns its ears toward the sound, standing very still, then looks back at the owner. Sound: owl hooting, crickets, owner whispering "hear that?". 20-25s (Kitchen water): Kitchen at night, ordinary warm light from a lamp over the stove, beige tile floor, the flashlight lying on the counter. The dog drinks noisily from its steel water bowl, water dripping onto the tiles, then walks off toward the dark hallway. Sound: lapping water, dripping, claws on tile, owner yawning.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Porch at night

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

Late night walks hit different.
Just us, the crickets and one very suspicious owl.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
