Quiet Evening by the Lake

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A calm evening at the lake: walking out on the dock, sitting together at the end, watching ripples, lying down to the sound of crickets and walking back up toward the porch light.

TIMELINE

0-5s	Down the dock
5-10s	End of the dock
10-15s	Watching ripples
15-20s	Cricket chorus
20-25s	Walk back up

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Down the dock): Old wooden dock on a small lake, evening just after sunset, soft fading daylight, pink and grey sky over the calm water, dark trees on the far shore. The dog walks out along the dock ahead of the owner, claws tapping on the boards, tail swaying. Sound: claws on wood, gentle water lapping, frogs starting to croak. 5-10s (End of the dock): End of the wooden dock, evening, fading natural light, very still water. The dog sits beside the owner's bare feet dangling over the edge, looking out at the lake, the breeze moving the fur on its neck, then leans its shoulder against the owner's leg. Sound: water lapping on the posts, crickets, a quiet sigh. 10-15s (Watching ripples): Calm lake from the end of the dock, evening, dim natural light. A fish jumps a few meters away leaving rings on the water, and the dog's ears go up and it leans forward to watch the ripples spread, staying seated on the boards. Sound: small splash, owner whispering "did you see that?". 15-20s (Cricket chorus): Wooden dock on the lake, late evening, deep blue sky, the last bit of daylight on the water. The dog lies down on the boards beside the owner with its chin resting on its front paws, eyes half open, ears twitching at the sounds around it. Sound: crickets, frogs, a loon calling far away, slow breathing. 20-25s (Walk back up): Grassy slope from the lake up to a small cabin, dusk, almost dark, one yellow porch light on at the cabin. The dog walks up the grass ahead of the owner toward the porch light, stopping once to look back and wait, tail wagging slowly. Sound: crickets, footsteps on grass, owner says "let's go in, buddy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Down the dock

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
