Guarding the Chicken Coop

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A day with our chicken coop guard: the morning patrol, egg collecting supervision, watching the free-ranging hens, chasing off a crow and closing up the coop at dusk.

TIMELINE

0-5s	Morning patrol
5-10s	Egg collecting
10-15s	Watching the hens
15-20s	Crow on the fence
20-25s	Closing up at dusk

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Morning patrol): Backyard, early morning, cool grey daylight, damp grass. A small wooden chicken coop with a wire run sits by the back fence, several brown hens pecking inside. The dog walks slowly along the outside of the wire run with its nose low, sniffing the ground and glancing at the hens. Sound: hens clucking, a rooster crowing far away, wet grass under paws. 5-10s (Egg collecting): Next to the coop, early morning light. The owner's hand opens a small wooden nest box lid and lifts out two brown eggs. The dog sits calmly beside the owner's rubber boots, ears up, watching the hand, tail sweeping the grass. Sound: wooden lid creaking, hens clucking, owner says "two today, buddy". 10-15s (Watching the hens): Fenced backyard, mid-morning, bright overcast daylight, patchy grass and a vegetable bed. Three brown hens wander and peck in the grass. The dog lies in the grass nearby, head up, calmly watching as one hen walks right past its front paws. Sound: hens clucking softly, birds, a light breeze. 15-20s (Crow on the fence): Same backyard, midday, grey sky, wooden fence at the back. A black crow lands on top of the fence near the coop. The dog stands up, gives one deep bark and trots toward the fence, and the crow flaps away. The dog stays by the coop looking up. Sound: one deep bark, crow cawing, wings flapping. 20-25s (Closing up at dusk): Backyard at dusk, fading blue-grey daylight, the porch light on at the house. The owner's hand swings the small coop door shut and slides the latch. The dog sits right next to the coop, then turns and walks beside the owner's boots toward the back door. Sound: latch clicking, crickets, owner saying "good job today".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Morning patrol

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
