Making Friends With a Goat

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Visiting a friend's small farm where our dog meets a goat: sniffing through the fence, the goat walking up, a curious sniff on the ear, feeding time and a walk along the fence.

TIMELINE

0-5s	Fence sniff
5-10s	Goat walks up
10-15s	Ear sniff
15-20s	Feeding time
20-25s	Fence line walk

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Fence sniff): Small farm, sunny afternoon, a wire fence with wooden posts, dry grass and dirt. A white goat with short horns walks up to the fence from the other side. The dog, on a red leash held by the owner, sniffs the goat's nose through the wire, tail wagging slowly. Sound: goat bleating, sniffing, owner says "hi goat". 5-10s (Goat walks up): Inside a dusty paddock, sunny afternoon, scattered hay on the ground and a wooden feeder. The white goat walks straight toward the dog and bleats loudly. The dog stops in place on its loose leash, ears back a little, and stretches its nose out carefully. Sound: loud bleat, hooves on dirt, owner laughing "she's bossy". 10-15s (Ear sniff): Same paddock, warm afternoon sun, dusty ground. The goat sniffs along the dog's neck and nibbles at its ear fur. The dog stands still, blinking, tail low and slowly wagging, then turns its head and sniffs the goat's face back. Sound: goat snuffling, a soft bleat, owner saying "you're okay". 15-20s (Feeding time): Paddock, late afternoon sunlight, wooden feeder and hay. The owner's open hand holds a few goat feed pellets and the goat eats them, lips brushing the palm. The dog sits beside the owner's boots watching with its head tilted, ears up. Sound: goat munching, owner says "no, these aren't for you". 20-25s (Fence line walk): Along the paddock fence, early evening, soft fading daylight, dry grass. The dog walks on a loose leash on the outside of the fence while the white goat walks along the inside, the two of them moving side by side at the same pace. Sound: hooves and paws on dry grass, goat bleating, birds.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Fence sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
