Taking Care of My Sick Kid

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Our son stayed home sick and the dog never left him: the morning check-in, waiting by the bed, a couch cuddle, bringing his favorite toy and sleeping by the bed at night.

TIMELINE

0-5s	Morning check-in
5-10s	Waiting by the bed
10-15s	Couch cuddle
15-20s	Brings a toy
20-25s	Night by the bed

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Morning check-in): Kid's bedroom, morning, grey daylight through half-closed blue curtains, a messy bed with a dinosaur blanket. A boy lies in bed with tired eyes. The dog walks to the side of the bed and rests its chin on the mattress next to his hand, looking at him. Sound: quiet room, a small cough, boy saying weakly "hi buddy". 5-10s (Waiting by the bed): Same bedroom, late morning, soft grey daylight. Mom's hands set a cup of water on the nightstand. The dog lies on the carpet beside the bed, head up, watching the boy, ears turning at each cough, not moving from its spot. Sound: cough, glass set down, mom saying "he hasn't left your side". 10-15s (Couch cuddle): Living room, midday, overcast light through the window, the boy lying on the couch under a fleece blanket. The dog steps up onto the couch carefully and lies down along his legs, resting its head on his knee while his hand strokes its fur. Sound: couch creaking, a long doggy sigh, quiet TV in the background. 15-20s (Brings a toy): Same living room, afternoon, grey daylight. The dog walks over carrying a squeaky stuffed duck and drops it gently on the blanket by the boy's hand, then sits and watches him. The boy smiles and picks it up. The duck is soggy from being carried around all day. Sound: a soft squeak, boy laughing quietly "thanks, buddy". 20-25s (Night by the bed): Kid's bedroom at night, a small night lamp on the dresser, dark window. The boy sleeps in bed. The dog lies curled on the rug right next to the bed, eyes half open, then sighs and lowers its head onto its paws. Sound: quiet house, the boy breathing, a soft sigh, mom whispering "good nurse".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Morning check-in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
