Back to Training Class

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A refresher obedience class: a calm sit at the start, heel work around cones, a long down-stay, a fast recall across the room and treats and praise at the end.

TIMELINE

0-5s	Calm start
5-10s	Heel around cones
10-15s	Down-stay
15-20s	Fast recall
20-25s	Treats and praise

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Calm start): Indoor training facility, bright overhead lights, black rubber mat floor, a few other dogs and owners spread far apart in the background. The dog sits beside the owner's left leg, looking up at the owner's face, ears up and tail still. Sound: echoing room, a distant bark, trainer's voice calling "okay, everyone sit". 5-10s (Heel around cones): Same training room, bright indoor lights, a row of orange cones on the rubber floor. The dog walks in a tight heel at the owner's left leg, weaving around the cones, glancing up at the owner's hand holding a treat pouch. Sound: footsteps on rubber, owner saying "heel, good", tags jingling. 10-15s (Down-stay): Training room, bright overhead lights. The dog lies in a down on the black rubber mat while the owner's legs walk backward away from it. Another dog walks past in the background and the dog's eyes follow but its body stays down. Sound: owner saying "stay", trainer saying "nice job", a distant whine. 15-20s (Fast recall): Same training room, bright lights, open space on the rubber floor. The owner calls and the dog springs up and runs straight across the room, then slides into a sit right in front of the owner's sneakers, looking up. Two other dogs watch from the side of the room with their owners. Sound: owner calling "come", paws thumping, a few people clapping. 20-25s (Treats and praise): Training room near the exit, bright lights. The trainer, a woman in a navy fleece, holds out a small treat and the dog takes it gently, then the owner's hands rub its chest while it wiggles happily. A few loose bits of treat lie on the black mat. Sound: trainer saying "he remembers everything", owner laughing, happy panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Calm start

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
