Head Tilts at Strange Sounds

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A collection of head tilts as the dog hears odd noises: a squeak behind the owner's back, a high whistle, a silly question, a wind chime on the porch and a whistling kettle.

TIMELINE

0-5s	Hidden squeak
5-10s	High whistle
10-15s	Silly question
15-20s	Wind chime
20-25s	Kettle whistle

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Hidden squeak): Living room, late morning, natural light from a big window, beige carpet. The dog sits facing the camera. The owner squeezes a squeaky toy hidden behind their back. The dog's ears shoot forward and he tilts his head far to one side, then to the other, staring at the owner's hidden hand. Sound: two quick squeaks, owner giggling, quiet room. 5-10s (High whistle): Kitchen, morning daylight, grey tile floor and a wooden table with chairs. The dog stands near the table. The owner makes a long, wobbly, high-pitched whistle. The dog freezes, ears up, and tilts his head sharply sideways, holding the tilt for a moment before straightening up. Sound: a silly high whistle, fridge hum, the dog's tags clinking. 10-15s (Silly question): Bedroom, afternoon, overcast light through a window, unmade bed. The dog sits on the carpet next to the bed. The owner asks in a squeaky voice if he wants to go see the squirrels. The dog tilts his head left, then right, then left again, ears twitching with each word. Sound: owner asking "you wanna see the squirrels?", the dog's small whine. 15-20s (Wind chime): Back porch, breezy grey afternoon, wooden deck boards and a metal wind chime hanging from the roof edge. The dog lies on the deck, then lifts his head as the chime rings in the wind. He stares up at it and tilts his head slowly to one side, ears pointed up. Sound: wind chime tinkling, breeze, distant traffic. 20-25s (Kettle whistle): Kitchen in the evening, ordinary overhead light on, a metal kettle on the stove starting to whistle. The dog stands on the tile floor nearby, takes one step back, then tilts his head deeply while staring at the stove. The owner's hand lifts the kettle off and the dog wags. Sound: kettle whistling then stopping, owner saying "it's just tea", tail swishing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hidden squeak

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
