Ball Stuck Under the Couch

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

The ball rolls under the couch and the dog is devastated: sniffing, pawing, asking for help with a bark, supervising the owner's rescue and celebrating when the ball comes out.

TIMELINE

0-5s	Nose under couch
5-10s	Paw scraping
10-15s	Asking for help
15-20s	Supervising
20-25s	Rescued ball

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Nose under couch): Living room, afternoon, natural light from a side window, dark grey couch on a wooden floor. A tennis ball rolls under the couch. The dog drops onto his belly right in front of it, pushes his nose into the narrow gap under the couch and sniffs loudly. Sound: ball rolling on wood, loud sniffing, owner saying "uh oh". 5-10s (Paw scraping): Same living room, afternoon daylight, dust visible on the floor near the couch. The dog lies on his side and reaches one front leg deep under the couch, scraping his paw back and forth along the floor, his face pressed sideways against the couch cushion edge. Sound: claws scraping wood, frustrated grunts, tags tapping the couch leg. 10-15s (Asking for help): Living room, natural afternoon light. The dog stands up, looks straight at the camera, then looks back at the couch and back at the camera again. He gives one short bark and taps his front paw on the floor, tail wagging slowly. Sound: one sharp bark, owner laughing "you want me to get it?". 15-20s (Supervising): Living room floor, afternoon window light. The owner lies on their stomach, filming with one hand and reaching the other arm under the couch. The dog lies right next to the owner's head, his face very close to the camera, watching the arm intently and panting. Sound: owner straining "almost got it", close panting, arm sliding on the floor. 20-25s (Rescued ball): Same living room, afternoon light. The owner's hand pulls the dusty tennis ball out from under the couch with a small clump of dust stuck to it. The dog grabs it gently, spins around and prances across the room with the ball in his mouth, tail high. Sound: happy whine, paws pattering on wood, owner saying "you're welcome".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Nose under couch

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog grabs it gently, spins around and prances across the room with the ball in his mouth, tail high. Sound: happy whine, paws pattering on wood, owner saying "you're welcome".

FACEBOOK CAPTION

This happens at least four times a day.
I found six other balls under there too.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
