The Hide the Treat Game

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A rainy-afternoon brain game: finding a treat under a cup, unrolling a towel, picking the right fist, digging under a cushion and sniffing it out of a shoe by the door.

TIMELINE

0-5s	Under the cup
5-10s	Towel unroll
10-15s	Pick a hand
15-20s	Cushion dig
20-25s	Shoe search

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Under the cup): Living room floor, rainy afternoon, dim grey window light, beige rug. The owner's hand places a small biscuit on the rug and covers it with an upside-down plastic cup. The dog sniffs the cup, then knocks it over with his nose and eats the treat. Sound: rain on the window, plastic cup tipping, crunching. 5-10s (Towel unroll): Same living room, rainy daylight. A rolled-up striped hand towel lies on the rug with a treat hidden inside. The dog pushes it with his nose and paws until it unrolls, sniffing along each fold, and finds the treat in the middle. Sound: soft fabric rustling, focused sniffing, owner saying "keep looking". 10-15s (Pick a hand): Living room, rainy afternoon, lamp switched on. The owner holds out two closed fists in front of the sitting dog. The dog sniffs both carefully, then taps the right fist with his front paw. The hand opens to show a treat and he takes it gently. Sound: sniffing, owner saying "which one?" then "yes!". 15-20s (Cushion dig): Grey couch in the living room, rainy window light and a lamp on. The owner tucks a treat under one couch cushion. The dog pushes his whole snout under the cushion edge, lifting it with his nose and digging with one paw until he gets the treat. Sound: cushion rustling, snorting, owner laughing. 20-25s (Shoe search): Front entryway, rainy afternoon, grey light from a small door window, a row of sneakers and boots on a mat. The dog walks along the shoes sniffing each one, stops at one sneaker, pokes his nose deep inside and pulls his head back chewing. Sound: rain outside, sniffing, crunch, owner saying "good nose".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Under the cup

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
