Learning Spin and Bow

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Patio training session for two new tricks: a clumsy first spin, a smoother second spin, a first bow try, an accidental lie-down and finally a clean bow.

TIMELINE

0-5s	First spin
5-10s	Better spin
10-15s	Bow attempt
15-20s	Lies down instead
20-25s	Clean bow

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First spin): Back patio, sunny morning, grey concrete slabs and potted plants along the edge. The owner's hand holds a treat near the dog's nose and draws a wide circle. The dog follows it in a wobbly, slow circle, bumping into a potted plant on the way around. Sound: birds, owner saying "spin", claws on concrete. 5-10s (Better spin): Same patio, bright morning daylight, a folded lawn chair against the wall. The owner makes a smaller circle with just the hand. The dog turns a quick, neat full circle and sits back down facing the owner, tail sweeping the concrete. Sound: owner saying "good spin!", crunching a treat. 10-15s (Bow attempt): Back patio, morning sun and a little shade from the roof edge. The owner lowers a treat to the ground between the dog's front paws. The dog drops his chest and front legs to the ground while his back end stays up in the air for a moment. Sound: owner whispering "bow", the dog's soft grunt. 15-20s (Lies down instead): Same patio, morning daylight. The owner tries the bow again, but the dog lets his back end sink too and lies down fully on the concrete, looking up at the owner expectantly, ears perked, as if that was the trick. Sound: owner laughing "that's a down, buddy", birds chirping. 20-25s (Clean bow): Back patio, bright morning. The dog does a proper bow with his front end low and his rear up, holds it for a second, then gets the treat. He immediately spins a happy circle on his own without being asked. Sound: owner cheering "yes!", excited panting, claws tapping.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First spin

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
