Balancing a Treat on His Nose

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

The classic treat-on-the-nose challenge in the kitchen: a careful setup, an early drop, a shaky wait full of drool, a quick catch and staring at the treat jar for more.

TIMELINE

0-5s	The setup
5-10s	Early drop
10-15s	Shaky wait
15-20s	The catch
20-25s	Treat jar stare

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (The setup): Kitchen, early evening, overhead light on, beige tile floor and a dishwasher in the background. The dog sits facing the camera. The owner's fingers place a small flat biscuit on top of his nose. His eyes cross slightly to look at it and he holds perfectly still. Sound: owner saying "wait... wait", fridge hum. 5-10s (Early drop): Same kitchen, ordinary overhead light. The dog's head wobbles and the biscuit slides off his nose and falls onto the tile. He snaps it up from the floor in half a second and crunches it, looking very pleased with himself. Sound: biscuit clicking on tile, fast crunching, owner laughing "that doesn't count". 10-15s (Shaky wait): Kitchen, overhead light on. The biscuit is back on his nose. The dog sits rigid, eyes locked on the treat, a thin string of drool hanging from his lip, his front paws shifting slightly while he holds his head still. Sound: owner saying "wait", the dog's tiny whine, quiet kitchen. 15-20s (The catch): Same kitchen, overhead light. The owner says okay. The dog dips his nose, the biscuit slides off, and he snaps it out of the air just before it hits the floor, then chews it with his tail sweeping the tiles. Sound: owner yelling "okay!", a snap of jaws, cheering, crunching. 20-25s (Treat jar stare): Kitchen counter area, evening overhead light, a clear plastic treat jar on the counter. The dog sits right below the counter, licking his lips, staring up at the jar, then looking at the camera, then back at the jar. His tail sweeps slowly back and forth across the floor. Sound: lip licking, owner saying "one more? fine", lid twisting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | The setup

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Kitchen, early evening, overhead light on, beige tile floor and a dishwasher in the background. The dog sits facing the camera. The owner's fingers place a small flat biscuit on top of his nose. His eyes cross slightly to look at it and he holds perfectly still. Sound: owner saying "wait... wait", fridge hum.

Clip 2 | 5-10s | Early drop

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
