Putting His Toys Away

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Teaching the dog to tidy up: picking up a rope toy, dropping it in the basket, getting distracted by a plush duck, taking one out while putting one in, and resting by a full basket.

TIMELINE

0-5s	Picking up
5-10s	Into the basket
10-15s	Distracted
15-20s	One in, one out
20-25s	Tidy at last

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Picking up): Living room, morning, natural light through a window, toys scattered across a beige carpet and a round fabric toy basket by the couch. The owner points to a rope toy. The dog picks it up and looks at the owner, waiting for the next instruction. Sound: owner saying "tidy up", tags jingling. 5-10s (Into the basket): Same living room, morning light. The dog walks to the fabric basket and drops the rope toy right in. He looks back at the owner and his tail wags hard when he hears the praise. A few other toys are still scattered across the carpet behind him. Sound: soft thump of the toy in the basket, owner saying "yes! good boy!". 10-15s (Distracted): Living room, morning daylight. The dog picks up a yellow plush duck, walks straight past the basket, lies down on the carpet and starts chewing the duck happily, squeaking it over and over. The fabric basket sits a few steps away, untouched, near the couch. Sound: repeated squeaking, owner saying "the basket, buddy, the basket". 15-20s (One in, one out): Same living room, morning light, the basket half full. The dog drops a tennis ball into the basket, then immediately sticks his head into the basket and pulls out a different toy, a blue squeaky bone, and trots away with it. Sound: ball thudding, owner laughing "that's not how it works". 20-25s (Tidy at last): Living room, late morning daylight, the carpet now clear and the fabric basket full of toys. The dog lies down beside the basket and rests his chin on its rim, letting out a long sigh, tail softly wagging. The morning light falls across the carpet next to him. Sound: a long sigh, soft tail thumps, owner saying "look at that, all clean".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Picking up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
