Puppy's First Walk

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Our puppy's very first walk on a leash: biting the leash, refusing to move, sniffing a dandelion, finally trotting along and coming home for water.

TIMELINE

0-5s	Leash biting
5-10s	Brakes on
10-15s	Dandelion sniff
15-20s	Trotting along
20-25s	Home and water

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old German Shepherd puppy, black and tan with fluffy fur, oversized paws and floppy ears that are just starting to stand, wearing a small brown collar. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Leash biting): Front porch, cool morning, soft overcast daylight, a doormat and a potted plant. The owner's hand clips a thin red leash to the puppy's small collar. The puppy immediately grabs the leash in his mouth and tugs it, shaking his head with tiny growls. Sound: tiny growls, leash clip clicking, owner laughing "it's not a toy". 5-10s (Brakes on): Quiet neighborhood sidewalk, morning overcast light, grass strips and parked cars. The puppy sits down on the sidewalk and refuses to move, leash slightly tight. Then he suddenly hops forward with a clumsy bounce toward the owner's sneakers. A neighbor's bicycle leans against a fence nearby. Sound: owner saying "come on, little guy", birds, distant car. 10-15s (Dandelion sniff): Edge of the sidewalk, morning light, a strip of grass with a few yellow dandelions. The puppy stops and pushes his nose into a dandelion, sniffing hard, then sneezes so hard his whole head shakes. A few blades of grass stick to his wet nose afterwards. Sound: a tiny sneeze, owner giggling "bless you". 15-20s (Trotting along): Neighborhood sidewalk, morning overcast light, trees along the street. The camera points down at the puppy trotting clumsily right beside the owner's sneakers, oversized paws flopping and floppy ears bouncing with each step, looking up now and then. His small brown collar tag swings with every step. Sound: tiny paws pattering, collar tag jingling, owner saying "good job". 20-25s (Home and water): Kitchen at home, morning daylight from the window, grey tile floor. The puppy laps water noisily from a small steel bowl, then flops down on his belly on the cool tile next to it, panting with his tongue out. His small belly rises and falls quickly as he rests. Sound: noisy little laps, panting, owner saying "first walk done".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Leash biting

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. Sound: noisy little laps, panting, owner saying "first walk done".

FACEBOOK CAPTION

Our very first walk! Total distance: about one block.
He was exhausted. So proud of him.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
