Puppy Falls Asleep Everywhere

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A day of puppy naps in the strangest places: next to the food bowl, on the owner's shoes, mid-play with a toy, under a lawn chair and finally in the owner's lap.

TIMELINE

0-5s	Food bowl nap
5-10s	Shoe pillow
10-15s	Mid-play crash
15-20s	Shade nap
20-25s	Lap nap

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old German Shepherd puppy, black and tan with fluffy fur, oversized paws and floppy ears that are just starting to stand, wearing a small brown collar. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Food bowl nap): Kitchen, morning daylight from the window, beige tile floor. The puppy is fast asleep right next to his empty food bowl, his face resting on the floor beside it, one paw still in the bowl. His belly rises and falls slowly. Sound: quiet kitchen, tiny snores, owner whispering "he finished breakfast". 5-10s (Shoe pillow): Front hallway, late morning, natural light from a small window, shoes lined up on a mat. The puppy is asleep on top of the owner's sneakers, using one shoe as a pillow, his back paws twitching in a dream. A pair of boots stands beside him on the mat. Sound: soft puppy breathing, a tiny dream whimper. 10-15s (Mid-play crash): Living room rug, afternoon window light. The puppy is lying on his side with a small plush toy still in his mouth, eyes closed, completely asleep. His paws twitch and his ears flick once as the camera comes closer. His fluffy belly rises and falls slowly as he sleeps. Sound: quiet room, owner whispering "he was playing ten seconds ago". 15-20s (Shade nap): Backyard, warm afternoon, bright daylight with shade under a white plastic lawn chair, green grass. The puppy is curled up asleep in the shade under the chair, fluffy fur moving slightly in the breeze. A small water bowl sits on the grass nearby and leaves rustle on the fence. Sound: birds, light breeze, a tiny sigh. 20-25s (Lap nap): Living room couch in the evening, warm table lamp on, a grey blanket over the owner's legs. The puppy is asleep curled up in the owner's lap, chin resting on the owner's arm. He hiccups once in his sleep and keeps sleeping. Sound: tiny puppy hiccup, quiet TV murmur, owner chuckling softly.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Food bowl nap

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
