Spring Treat Hunt in the Garden

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A spring morning treat hunt in the garden: hiding dog biscuits, the release, nose-down searching, finds behind a flower pot and under a bench, and checking for more.

TIMELINE

0-5s	Hiding treats
5-10s	The release
10-15s	Flower pot find
15-20s	Under the bench
20-25s	Any more?

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Hiding treats): Small backyard garden, fresh spring morning, soft natural daylight, new green grass and pots of purple petunias along a wooden fence. The owner's hand tucks a small dog biscuit into a clump of grass while the dog waits in a sit in the background, ears up. Sound: birds chirping, owner saying "stay, no peeking". 5-10s (The release): Same garden, spring morning light. The owner says find it. The dog jumps up and races onto the lawn with his nose down, zigzagging across the grass, sniffing hard with his tail straight out behind him. Dew still shines on the grass along the fence. Sound: owner saying "find it!", busy sniffing, paws on grass. 10-15s (Flower pot find): Garden edge, morning daylight, terracotta pots with petunias on the stone path. The dog sniffs around the back of a pot without touching the flowers, finds a biscuit hidden behind it and crunches it right away, tail wagging. Another biscuit is still hidden somewhere near the fence. Sound: crunching, owner saying "good find!", birds. 15-20s (Under the bench): Garden corner, spring morning light, an old wooden garden bench on the grass. The dog pushes his head under the bench, his back end wiggling in the air, and comes out chewing another biscuit with a bit of grass stuck to his nose. Sound: wood creaking, snorting, owner laughing. 20-25s (Any more?): Middle of the garden lawn, morning light. The dog sits in front of the owner, staring up, a little dirt on his nose. The owner shows both open empty hands. The dog keeps staring, then sniffs the owner's pocket. The sun is just coming over the fence behind them. Sound: owner saying "that's all of them", hopeful whine, birds.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hiding treats

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
