Spring Cleaning the Yard

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Spring yard cleanup with a very involved helper: following the rake, stealing a stick, escorting the wheelbarrow, finding an old lost toy and resting on the clean grass.

TIMELINE

0-5s	Following the rake
5-10s	Stick thief
10-15s	Wheelbarrow escort
15-20s	Lost toy found
20-25s	Clean yard rest

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Following the rake): Backyard, cool spring morning, natural overcast daylight, damp grass with old brown leaves left over from winter, a wooden fence. The owner rakes the old leaves. The dog follows right behind the rake, sniffing every newly uncovered patch of grass. Sound: rake scraping, leaves rustling, birds chirping. 5-10s (Stick thief): Same backyard, spring morning light, a small pile of fallen sticks by the fence. The dog picks out a long stick from the pile and trots off proudly across the yard with it, head high, the stick swaying. He drops it in the middle of the lawn and lies down to chew it. Sound: sticks clattering, owner calling "that was for the bin!", paws on grass. 10-15s (Wheelbarrow escort): Backyard, overcast spring morning. The owner pushes a green wheelbarrow full of leaves across the lawn. The dog walks alongside it, sniffing the side and the turning wheel, staying a step away from it. Birds hop on the fence behind them and the morning air looks cool and damp. Sound: wheelbarrow wheel squeaking, footsteps, the dog's tags jingling. 15-20s (Lost toy found): Backyard by a bush along the fence, spring morning light. The owner's hand pulls an old, faded, dirty squeaky toy out from under the bush. The dog's ears shoot up, he grabs it and squeaks it over and over, tail wagging. Sound: muffled squeaking, owner laughing "so that's where it went". 20-25s (Clean yard rest): Back steps of the house, late morning, soft daylight, the lawn now raked and tidy. The owner sits on the steps with a water bottle. The dog lies on the grass right beside them, resting his head on the bottom step, panting gently. Sound: birds, gentle panting, owner saying "nice work, partner".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Following the rake

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
